Career Objective

Aspiring Software Engineer with strong knowledge of C++, Data Structures and Algorithms, SQL, and Python. Passionate about problem solving and continuously learning modern technologies. Seeking an opportunity to contribute technical skills while growing as a Software Engineer in a dynamic organization.

Education

Siddhartha Institute of Engineering & Technology **Aug 2024 – May 2028**
B.Tech – Computer Science & Engineering *CGPA: 7.41*
D.P.C.S.S. Miller Inter School, Patna, Bihar
Intermediate *64.00%*
Bradford International School, Patna, Bihar
Matriculation *60.00%*

Technical Skills

Programming: C, C++, Python, SQL **Core CS:** Data Structures & Algorithms, OOP
Machine Learning: Classification, Regression, Data Preprocessing, Feature Engineering, Model Evaluation, EDA
Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn **Tools:** Git, GitHub, Jupyter Notebook, VS Code

Projects

Turbofan 3D Visualizer – C++ / Computer Vision

github.com/robin-singh1234/Turbofan-3D-Visualizer

- Built a real-time 3D turbofan visualization using **C++ and Raylib** with rotating fan, compressor and turbine stages, RPM gauge, telemetry, camera controls and engine audio.
- Implemented webcam-based hand gesture control using **Python, MediaPipe and OpenCV** for RPM adjustment, engine start/stop and boost mode.
- Integrated Python and C++ using runtime files and implemented real-time animation, combustion and exhaust flame visualization.
- **Tech:** C++, Raylib, Python, MediaPipe, OpenCV, OpenGL, Git, GitHub

Smart Task Manager – C++

github.com/robin-singh1234/Smart-Task-Manager

- Developed a console-based task management system using **C++ and OOP** with task creation, search, update, deletion and completion tracking.
- Implemented file handling for persistent task storage and automatic loading of saved tasks.
- **Tech:** C++, OOP, STL Vector, File Handling

Credit Card Fraud Detection – Machine Learning

github.com/robin-singh1234/Credit-Card-Fraud-Detection

- Developed a fraud detection model using **Logistic Regression** and evaluated it using Accuracy, Precision, Recall, F1-Score, Confusion Matrix and ROC-AUC.
- **Tech:** Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Titanic Survival Prediction – Machine Learning

github.com/robin-singh1234/Titanicsurvivalpredict

- Built a classification model to predict passenger survival with preprocessing, missing-value handling, categorical encoding, feature selection and model evaluation.
- **Tech:** Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Internship

Infosys Springboard
Virtual Internship – Artificial Intelligence & Machine Learning

- Completed practical training in Artificial Intelligence, Machine Learning, Generative AI and Deep Learning.
- Gained foundational knowledge of machine learning concepts, model development and emerging AI technologies.

Achievements

- Solved **233+ problems on LeetCode** with a strong focus on C++ and Data Structures & Algorithms.
- Completed **220+ problems from Striver's A2Z DSA Sheet**.

Certifications

Infosys Springboard: Artificial Intelligence & Machine Learning; Generative AI Unleashing; Introduction to Deep Learning

Hobbies

Problem Solving – Learning New Technologies – Chess
